

SHOREPOWER/INVERTER CHANGEOVER UNIT

Designed to automatically switch between two sources of AC power (usually shore and inverter). The switching is biased to shorepower, so if both AC sources are live, the inverter would be switched out of circuit. This prevents accidental flattening of batteries due to the inverter being loaded up without the users knowledge.

This unit can be easily inserted into existing AC systems, where a new inverter has been added.

- **Pre-wired AC Distribution Boxes**
- **Massively reduces complexity of installing AC electrics**
- **Ensures reliability, correct wiring & safety**
- **Reduces installation time and cost**
- **IP66 Rated cabinets**
- **5 year warranty**
